MECHANICAL & ENGINEERING

> Your Technical Partner, Anytime, Anywhere

Dependable Service 24/7,
365 Days-a-year by our Certified Engineers

ONE OPPORTUNITY A WORLD OF POSSIBILITIES

The object of One Tech Engineering is clear and concise: to provide the **highest quality engineering services** to our customers, whilst serving as a source of spare parts.

- Employing engineers with both a **strong technical background** and **unbridled creativity**, we are able to combine, master and advance these disciplines.
- We make ourselves accessible 24 hours a day, 7 days a week, 365 days a year, in making a bold statement to our partners: One Tech Engineering is dedicated to serving you. Our strong point is that our specialists are constantly evolving by practicing & gaining **impressive experience in shipyards**.

YOUR ONE & ONLY TECHNICAL PARTNER

➤ Third-Party Liability Insurance

This insurance covers any damage caused to the shipowner/vessel in case of damage caused to any ship equipment during the repair works by our specialists.

The guaranteed coverage amounts up to € 1,000,000 for each case.

➤ Personal Medical & Life Insurance

This insurance is intended to cover an accident that may happen to our specialist on the ship during the repair work. Thereby this insurance protects the interests of the shipowner, does not impose any responsibility on him and excludes any financial losses.

The guaranteed amount of insurance coverage is € 100,000 for each specialist.

➤ Reporting System

We are careful about the reporting system and improving it constantly.

➤ Safety

Safety comes first! We constantly monitor the implementation of all precautions and improve ourselves on a regular basis.

MAINTENANCE & REPAIRS

➤ A Variety of Planned or Emergency Repairs

Our specialists provide a variety of planned or emergency repairs during the voyage, anchorage & cargo operations all-over the world upon agreement with our customers.

The Engineers, Welders & Painters have all necessary travel documents (bio-passport, seaman's book, insurance, medical examination certificate etc.) which allow us to arrive on ships as soon as possible in any port of the world. Some of our specialists have US visa, thereby we are able to perform work on ships working in the Caribbean.

➤ Service Engineers & Technicians

Main & Auxiliary Engines (various types & sizes) • Turbocharges • Repairs, Maintenance and Servicing - Centrifugal, Screw, Gear, Piston pumps, Air Compressors • Purifiers etc. • Engine / Deck Machinery (winches, lifting equipment, etc.) around the world to assist our customers to avoid any delays, off-hire, reputational and financial losses accordingly.

➤ Qualified, Certified & Experienced Riding Squads

as extra crew for on-site repair or routine maintenance around the world.

CERTIFIED WELDERS, PAINTERS & HELPERS

➤ Certified Welders

Vessel Hull Steelworks • Pipes Replacement / Repairs (Steel & Inox Pipes) • Boilers • IGG • Manifolds • Deck Repairs • Ballast / Cargo Tanks

Special repair teams of welders (welders are certified by BV, GL, LR and RMRS) **perform repairs during a voyage or dry-dock.**

➤ Painters / Helpers

Ballast Tanks Maintenance • Coating Cosmetic Up-grade • Cleaners/Helpers (Tanks, Receivers, etc.) • Incinerator Refractory Repair • Hot Well Cleaning & Painting • Incinerator Settling & Service Tank Cleaning • Engine Room Sea Chest Filters Cleaning • Sewage Treatment Plant Cleaning & Painting • ME Crankcase, Scavenge Air Receiver & under Piston spaces Cleaning

BWTS & UTM

➤ BWTS, Electric Engineers

In accordance with the Ballast Water Treatment requirements, One Tech Engineering has a department which helps shipowners and ship management companies to solve their issues with ballast waters management on a one-stop basis.

One Tech Engineering engineers are trained specialists who have obtained all the necessary approvals and certificates, have become a service partner of leading manufacturers of BWT systems, which is approved by IMO as well as USCG.

➤ Ultrasonic Thickness Measurement (UTM)

Our engineers are trained in works such as Ultrasonic Thickness Measurement of the hull, the hull structures and steel structures of all ships systems and machinery while adhering to the strictest standards and safety regulations of fall protection.
